Size, tolerance & surface inspection

✓ All documents can be provided in original, scanned, or third-party verified formats upon request.

Dimensional checks are part of the process

Every order is verified for critical measurements and tolerances to make sure each piece meets the required specifications.

Size verification

Checking outer dimensions with precision tools.

Wall thickness

Confirming material thickness for consistency.

Diameter checks

Measuring diameters to ensure accuracy.

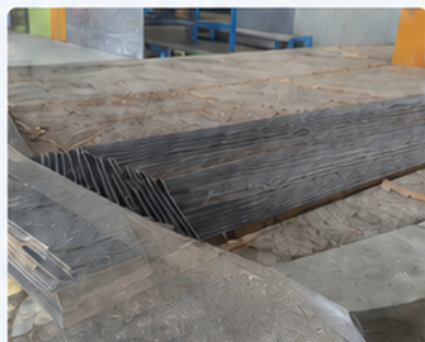

Length confirmation

Verifying length to match order requirements.

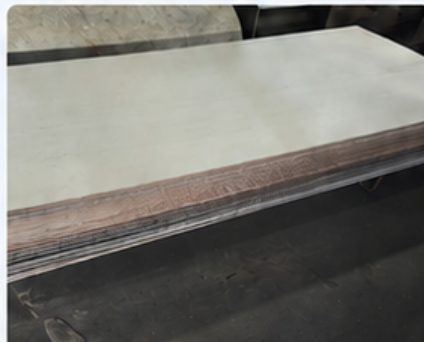

Prepared for handling and export

Products are carefully packed and loaded to protect quality during transport and delivery.

Flat packing

Sheets are stacked on pallets for stability.

Protective layers

Surface protection is applied to prevent scratches.

Secure strapping

Strong straps keep bundles tight and secure.

Container loading

Goods are loaded and arranged for safe transport.

Label and mark

Packages are labeled for easy identification.

Ready to ship

Load is secured and ready for export.

A straightforward path from specification to shipment

We make complex exports simple and predictable.

Specification review

Share your needs and product requirements.

Technical alignment

Confirm grades, dimensions, and tolerances.

Production & inspection

Manufacture to standard and inspect.

Packaging & labeling

Secure packing with clear labeling.

On-time shipment

Export docs, customs, and delivery.
